# LENDLAND.IO

FROM ONE SITE TO ANOTHER

01

Ammenities

To support the growth of a chain, the users need the best tools available in DeFi.

Lending and borrowing are not an exemption.

LENDLAND

LendLand

Our mission is to be the go-to place for Lending and Borrowing inside the Boba Network.

Providing an intuitive UI and secure code measures, we stand to become the users' preferred choice.

03

LENDLAND.IO

Lending

Users will be allowed to provide Liquidity for the Borrowing process, earning them a certain APY for the asset contributed.

After a certain period, the lenders will be able to take their liquidity alongside their earnings.

LENDLAND.IO

Borrowing

From the Liquidity provided, users will be able to borrow a certain amount by using a collateral.

This collateral will work as a safety measure for the lenders.

04

Liquidity Required

For a Lending Protocol to have a sustainable environment, the project must contribute Liquidity directly to initiate a space where Borrowers can begin using the protocol when Lenders are starting to put Liquidity.

Comparable Protocols:

KEOM

Keom @Polygon
Liquidity Available: US$ 421,000.00

Burrow

Burrow @Near Protocol
Liquidity Available:
US$ 66.64M

Initial Liquidity Required to Kickstart:
US$ 50,000.00

05

$LeLa

The primary token of the LendLAnd Protocol in the LendLand Network.
